Use Instructions

Installation

	0-10,000 gallons	10-20,000 gallons	20-30,000 gallons	Above 30,000 gallons
Contact Chambers	1 CC-F	2 CC-F	1 CC-STxS	Contact us
Starter Dose PoolMoss[®] for Fountains	PoolMoss [®] 1	2 PoolMoss [®] 1	1 PoolMoss [®] 3	
Maintenance Dose PoolMoss[®] for Fountains	PoolMoss [®] .5	2 PoolMoss [®] .5	1 PoolMoss [®] 2	

1. Open black contact chamber.
2. Insert PoolMoss[®] for fountains Starter dose into contact chamber (*Option – insert a few rocks into contact chamber to weigh it down*).
3. Snap contact chamber closed.
4. Insert contact chamber into fountain in an area with sufficient water flow – ideally underneath a waterfall feature.

Maintenance

- Change moss every 30 days.
- After first month, use PoolMoss[®] for fountains Maintenance dose (1/2 Starter dose).
- Discard used PoolMoss[®] for fountains in trash.
- Place new PoolMoss[®] for fountains in contact chamber and insert back into fountain.
- If treating the fountain with algaecide or shock or chlorine levels above 5 ppm, remove contact chamber from water before treatment and reinstall after algaecide dissipates or sanitizer levels return to desired range (below 5ppm).

- Do not change water in the fountain unless water quality requires it. PoolMoss® for fountains conditions water over time. If the water is changed, conditioned water goes down the drain. Begin with Starter dose for best results after a water change.
- When water is changed, change the PoolMoss® for fountains as well for best results.
- If winterizing your fountain, simply remove the contact chamber, dispose or compost refill contents, and store contact chamber.

Storage and Handling

- Keep PoolMoss® dry until use.
