We have been using PoolMoss Sphagnum Moss on three of our problem pools (about 1.5 million gallons) and the water has never looked this great! The clarity is amazing, even though we have occasional extremely high bather loads. Previously, we had several days every season when we had to shut down these attractions because of cloudy water. Since we have used the PoolMoss in the pools we have not had to shut anything down! Not only is our water crystal clear, but we have reduced ALL of the chemicals used and our chlorine use has gone down by 20%. We also experienced less chemical balance issues than in previous seasons. I would recommend PoolMoss to anyone looking to improve clarity, reduce chlorine usage, while helping to help clean the entire system.

In addition, the folks over at Main Line Commercial Pools have been great to work with. I consider them our go-to pool resource, and would highly recommend MLCP for anyone requiring construction expertise, technical knowhow, maintenance services, and system upgrades.

Sincerely,
Vince Cuilla
