## KEY BENEFITS

- **Improved Water Quality**
- **Improved Air Quality**
- **Stabilized pH and Alkalinity**
- **Reduced Water Usage**
- **Reduced Energy Usage**
- **Reduced Chemical Usage**
- **Reduced Maintenance**
- **Reduced Scale and Staining**
- **Reduced Corrosion**

naturally pure,  
healthier water.

# PoolMoss® Pro 2

In surge tank and large offline contact chambers, PoolMoss® Pro 2 is typically used with PoolMoss® Pro 3 to achieve an accurate Sphagnum moss dosage.

The strainer bag contains (2) “bricks” of PoolMoss®, which are also broken up and placed inside the contact chamber.

PoolMoss® Pro 2 is used and cared for in the same manner as PoolMoss® Pro 3

# PoolMoss® Pro 3

Component Certified to  
NSF/ANSI Standard 50

In surge tank and large offline contact chambers, PoolMoss® Pro 3 is the primary moss unit used in pool applications.

A durable strainer bag contains (3) “bricks” of PoolMoss® Pro, which are broken up and placed inside the contact chamber.

Each pool application can use as many units as the dosage requires. Dosage is adjusted to each pool by using the correct number of bricks.

Moss only needs to be changed once a month.

Providing  
naturally pure,  
healthier water.

# CC-STL

One of the more popular and most simple PoolMoss® Pro application methods uses the surge (balancing) tank.

PoolMoss® Pro is broken up within the strainer bag, loaded into the contact chamber, and lowered into the surge tank.

The existing circulation and activity in the pool works with PoolMoss® Pro to replicate the effects of an actual bog, and deliver its benefits throughout the system.

The CC-STL holds up to (8) bags of either PoolMoss® Pro 3 or PoolMoss® Pro 2.

## SIZING and KEY ATTRIBUTES

- 37" x 13" x 19" (HWD)
- 94cm x 33.02cm x 48.26cm (HWD)
- No plumbing required
- Accommodates up to 8 bags of PoolMoss® Pro 3 or PoolMoss® Pro 2
- Utilizes standard surge tank functionality and geometry to help treat entire system
- Easily accessed and maintained

\* Wooden pedestals are no longer used.

WATER  
SOLUTIONS**

# CC-STS

The CC-STS can be used independently, or in conjunction with the CC-STL. It is approximately the size of its big brother.

When using the CC-STS, PoolMoss® Pro is applied in exactly the same manner as the CC-STL.

The existing circulation and activity in the pool works with PoolMoss® Pro to replicate the effects of an actual bog, and deliver the benefits throughout the system.

The CC-STS holds up to (4) bags of either PoolMoss® Pro 3 or PoolMoss® Pro 2.

## SIZING and KEY ATTRIBUTES

- 19.5" x 12.5" x 18" (HWD)
- 49.53cm x 31.75cm x 45.72cm (HWD)
- No plumbing required
- Accommodates up to 4 bags of PoolMoss® Pro 3 or PoolMoss® Pro 2.
- Utilizes standard surge tank functionality and geometry to help treat entire system.
- Easily accessed and maintained

\* Wooden pedestals are no longer used.

Providing  
naturally pure,  
healthier water.

# CC-80, 90, 140 and 150

The CC-80, 90, 140 and 150 are offline chambers that provide greater ease of use with PoolMoss® Pro.

They are easily plumbed into the existing pool system using a bypass (sidestream) method.

Creating a unique tumbling action within the chamber, each CC-140 holds up to (12) PoolMoss® Pro 3 or PoolMoss® Pro 2. The effects of an actual bog are replicated within the chamber, and efficiently delivered throughout the system.
